

Every MD's Dream: Earn **£1000's** extra by trading with the ultimate supplier

SOS Communications are distinguished distributors and brokers of **new** and 2nd user telecoms systems.

SOS Communications:
Enabling true dealer support

> New wave LCR

Earn **huge commission** from this new technology. The PRI-GSM Gateways are one of many solutions to provide the reduction of landline to mobile costs. SOS Communications offer a range of GSM Gateways starting from £235 + VAT Order in January and we will provide free training at your premises.

PRI-GSM GATEWAYS

- 16 - 30 channel PRI-GSM (E1-GSM) gateway's
- 2 x PRI port call through, no need of additional PRI port at PBX side
- Powerful Least Cost Routing
- 4 SIMs per channel in the basic configuration for no extra charge
- Only 1 high gain (YAGI) antenna
- Professional, comfortable and easy programming tool (Windows platform)
- Latest and compact design (3U size) with integrated antenna splitter 16/1
- User friendly LED indicators on front panel with notification of all important statuses (SIM card errors, PRI layers, etc.)
- Hot swappable GSM modules and SIMs with easy access from front
- Auxiliary handset port for making test calls
- NOT PC based (absolutely stable system)
- All maintenance functions executable while SIM cards are in service
- Detailed statistic data on all incoming and outgoing calls
- SMS send and receive options. The gateway allows sending SMS in the PDU format
- PRI GSM can be configured and supervised remotely or locally.
